To give away money is an easy matter in any man's power. But to decide to whom to give it, and how large and when, and for what purpose and how, is neither in every man's power nor an easy matter. Hence it is that such excellence is rare, praiseworthy and noble.

--Aristotle, Ethics, 360 BC

Course Description:

Charitable giving in the United States topped 370 billion dollars in 2016, and over 70% of those dollars came from individual giving. Is this money well spent? Unfortunately, only some charities are effective. This course will introduce students to nonprofits, philanthropy, and how to give money away. It will cover theories of giving, the nonprofit sector, and criticisms of both. A significant portion of the course will focus on providing students with the tools and skills to evaluate charitable programs for effectiveness using social scientific techniques. We will also address the relationship between philanthropic and state-sponsored programs and discuss issues of social responsibility that arise when billionaires, foundations, and corporate actors engage in philanthropic work.

The experiential learning portion of the class will introduce students first-hand to the dilemmas donors face as they evaluate nonprofits. Based on their own evaluations, students will have the opportunity to distribute significant funds (provided through The Philanthropy Lab and individual donors), to charitable organizations. Students will be placed into groups that will do extensive research on a category of nonprofits, ultimately deciding which charities will receive funds through discussion and debate.

Course Materials:

Other course readings available through Canvas.
**Course Requirements and Grading:**

**Class Participation** (10%) As in all college courses, students should come to class having read and thought about the assigned readings. Regular and thoughtful contributions to classroom discussions are essential to the success of the seminar. Also, attendance matters. Make sure you sign in on the attendance sheet every day. Your attendance will be considered in your overall participation grade. Only students who have attended regularly will vote on the final distribution of the funds. Finally, you will also be evaluated on your participation in group work.

**Paper 1** (10%) 250 words, one page. Due: first draft on January 26, revision on February 9. Details provided in handout.

**Paper 2** (15%) 500 words, two pages. Due: March 23. Details provided in handout.

**Paper 3** (20%) 1250 words, five pages. Due: April 20. Details provided in handout.

**Oral Presentations** (20%) individual and within debates.

**Self and group evaluations** (5%) 500 words, two pages. Due: May 2. Details provided in handout.

**Final exam** (20%) May 14, 9:00-12:00

Grades will include + and – distinctions. Your grade will be docked one grade per day late, for any assignment.

Overview of Process for the Distribution of the Funds

January 17: students fill in choices for groups
   • 5 groups of ~3 students each

January 24: students receive group assignments and begin discussion of overall goals for giving.

January 31: groups meet for more discussion of overall goals.
   • Each student charged with finding three charitable organizations that meet the goals of the group.
   • That means ~9 organizations per group.
   • Students will need to compile some basic information about their three organizations before the next group meeting.

Early February: groups review their organizations

February 21: group meetings to narrow the organizations to be considered to 1 per member of the group.
   • Should be based on criteria established by the group.
   • At this point, each group will cut down to considering only 3 organizations.
   • Each organization is assigned to one member of the group for further study.

February 26 – March 2: individuals work on paper #2, which is a report on their charity, and prepare a presentation on their charity for the upcoming presentations and debates.
March 5: Each member of each group will present information on their charity. Then groups will debate within themselves on the merits of their individually-assigned charities. The rest of the class will provide input.

• Within your assigned group you will be presenting information, arguing, and attempting to persuade other members of your group as well as the rest of the class.
• The end result is that each group will select down to one charity for further research.
• At this time we will have 12 finalist charities, one per group.

March 7: groups finalize their finalist charity.

March 7 - April 20: Groups organize due diligence research, further data collection, and tasks for group members. Each group will undertake serious study of their selected charity.

• All aspects of the organization – mission, program effectiveness, capacity of management and board to lead the organization, fiscal strength, etc. must be considered.
• Students will evaluate the charities using the tools learned in class
• Students will need to interview a representative from the charity or do a site visit
• Students will check with university lawyers about potential grantees to make sure there are no legal problems
• Each student will use the results of their own research, as well as the group’s research, to write paper #3.

April 23: presentations and debates will provide detailed information for each group’s top choice. Each member of the group has to play some role. The class will be voting on the amounts of money to give to each of the charities.

• Presentations must include:
  The case for this type of charity
  Why this organization makes an impact
  Any specific recommendations you are making on the size of the gift, unrestricted or restricted use, the percentage of the agency’s budget the gift would be, possible uses of money (how much they need to make an impact)
• Each group will be assigned an opposing group, who will prepare a rebuttal. Groups will have a chance to respond to the rebuttal, as well as to questions from the floor.

April 25: voting.

April 30: final decisions and voting. Final decisions will involve the number of charities to give to and the amount to give to each charity. Only students who have attended regularly will vote on the final distribution of the funds. No more than 3 charities will receive donations.

May 14: checks will be presented to representatives of the selected charities.
